

3RD LABS WHO CARE WORKSHOP ON

LAB SUSTAINABILITY

Labs Who Care, Australasia's growing community for sustainable laboratories, invites you to the **3rd Annual Lab Sustainability Workshop**. Hear from leading sustainability champions, researchers, institutions and industry partners who are driving real change in laboratory sustainability—from behaviour change and operational improvements to tackling procurement-related Scope 3 emissions. Thanks to growing community demand and the continued support of Labs Who Care members across major Australian universities and their sustainability teams, Australasian Campuses Towards Sustainability (ACTS), and the Australian National Fabrication Facility (ANFF), this year's hybrid workshop will be co-hosted across **Melbourne, Sydney** and **Brisbane**.

Find the latest version of the program [here](#).

27th of August 2026 10:00–15:00 (AEST)
